**ABSTRAK**

Desain Formulir Transfer Pasien di Rumah Sakit Islam Kendal masih terdapat ketidaksesuaian dalam aspek analisis desain formulir dan elemen penilaian standar MKI 8 akreditasi KARS 2012. Tujuan penelitian ini adalah untuk menganalisis desain formulir, hasil kuesioner tentang desain formulir, butir data berdasarkan elemen penilaian standar MKI 8, mengidentifikasi kendala pengguna dan merancang ulang Formulir Transfer Pasien. Penelitian dalam studi ini adalah deskriptif dengan metode observasi, dan kuesioner (angket). Populasi dalam penelitian 14 subjek dan 1 objek Formulir Transfer Pasien. Hasil penelitian dari analisis desain formulir menunjukkan ketidaksesuaian teori pada aspek fisik (bahan dan ukuran), aspek anatomik (heading, instruction, body dan cara pengisian), dan aspek isi (kelengkapan butir data dan simbol), kurangnya desain formulir berdasarkan hasil kuesioner, ketidaksesuaian butir data pada elemen penilaian standar MKI 8 yaitu resume alasan rawat inap, temuan yang signifikan, dan obat-obatan/pengobatan yang diberikan dan adanya kendala pengguna yaitu kurang tertibnya petugas dalam pengisian formulir dan belum ditetapkan Standar Operasional Prosedur (SOP) Pengisian Formulir Transfer Pasien. Disarankan agar membuat rancangan Formulir Transfer Pasien sesuai dengan teori, hasil kuesioner, elemen penilaian standar MKI 8 akreditasi KARS 2012 dan kebutuhan pengguna dan pembuatan Standar Operasional Prosedur (SOP) pengisian Formulir Transfer Pasien di Rumah Sakit Islam Kendal.

**ABSTRACT**

From analytical aspect, the Design of Patient Transfer Form at Kendal Islamic Hospital were not in accordance with element assessment of standard MKI 8 KARS 2012 accreditation. This study aims to analyze the design form based on element assessment of standard MKI 8, identify the user constraints and redesign Patient Transfer Form. Descriptive study was conducted by observing Patient Transfer Form and distributing questionnaires to 14 respondents. The results of study show that, design form on physical aspect (material and size), anatomical aspect (heading, instruction, body and filling), and content aspect (completeness of data items and symbols) were inconsistent with the theory, lack of design based on questionnaire results was a mismatch of data items on element assesment of standard MKI 8 such as resume of hospitalized reasons, significant findings, and medications / given treatment. The constraints was user less orderly in filling out the form and there is no Standard Operating Procedure (SOP) Filling Patient Transfer Form. Suggestion, make Patient Transfer Form design according to theory, questionnaire result, element assessment of standard MKI 8 KARS 2012 accreditation and user requirement and arrange Standard Operational Procedure (SOP) filling Patient Transfer Form at Kendal Islam Hospital.
